

## PRODUCT SERIES

### BELZONA® 1000 SERIES

#### Metallic Polymers

For the repair and protection of machinery and equipment

### BELZONA® 2000 SERIES

#### Elastomeric Polymers

For abrasion resistant linings and the repair and protection of flexible components

### BELZONA® 3000 SERIES

#### Polymeric Membranes

Waterproofing and weatherproofing systems for the repair and protection of buildings and structures

### BELZONA® 4000 SERIES

#### Magma Polymers

For the repair and protection of concrete subject to abrasion, impact, and chemical attack

### BELZONA® 5000 SERIES

#### Environmental Polymers

For protection from physical, chemical, or bacterial attack in a diverse range of environments

#### COST-EFFECTIVE BELZONA SOLUTIONS

- Reduce downtime
- Lower maintenance costs
- Improve efficiency
- Simplify maintenance procedures
- Extend machinery and equipment life

#### CUSTOMER SERVICE

Local support is provided by a network of trained Belzona technical consultants who will diagnose the problem, recommend the Belzona solution, and provide on-site application training and supervision 24 hours a day.

#### GLOBAL ENGINEERING SUPPORT

Our team of qualified industry professionals utilize their extensive knowledge and experience to train and advise customers on the use and application of Belzona products.

#### RELIABILITY IN SERVICE

On countless occasions Belzona repairs and protective coatings have outlasted the original equipment, component or structure. This is why many products and applications are internationally approved by engineers, contractors and specifiers alike.

Since its beginning in 1952, Belzona has been committed to developing and manufacturing polymeric solutions and providing customers with 24/7 technical support.

As a result of continuous research and development stretching over decades, Belzona is now able to provide a full range of repair and maintenance solutions to all types of HVAC equipment. Belzona know-how solutions address common maintenance problems such as chiller corrosion, leaks in pipework, loose and poorly sealed ductwork, erosion-corrosion of fan blades, damaged thermal insulation and poor weather proofing and waterproofing of roofs. Belzona products are developed for extreme conditions, making them well suited for any application environment. Belzona increases the performance and reliability of the equipment and ensures environmental compliance. Belzona also offers cost saving long-term solutions to keep equipment and structures intact and well-maintained.
